

Our products are made of traceless PVC plastic-coated Shore A, but according to requirements can be made of other plastic materials.

Properties	Proof method	UOM	Value
Density	ISO.1183	GR/cm3	1,30
Hardness at 15 sec.	ISO 868	Shore A	90
Break load	ISO 527	N/mm2	14
Extension load	ISO 527	%	280

The material follows regulations ROHS N. 2002/95/CE and REACH N.1907/2006/CE

Our buffers are easily **adaptable** as they follow **standard sizes**, they are enough soft to **simplify installation** thank to their shaping feature.

Are there any particular requirements of **personalization**? Need to change the colour to differ from others? A new particular shape to protect? **Contacting us** is the way to find together the best solution for every need you have.

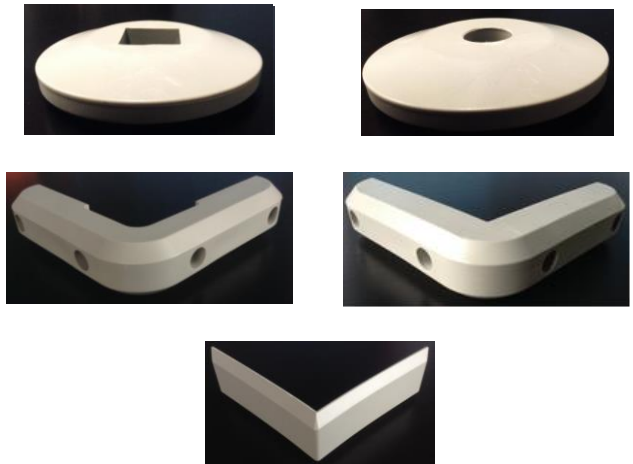

### Where we are ...

# FUTURA

Is pleased to introduce its new own production
